

ABOUT AMERICA

Population: 312 million **Territory:** 9,372,600 sq.km.

There are more than 24.7 million registered businesses in the United States

America is the world's third largest country in total area.

The United States consists of
FIFTY STATES & A FEDERAL DISTRICT

The United States of America is located in central North America, comprised of fifty states and a federal district, the capitol of Washington DC. America is bordered to the north by Canada, to the south by Mexico and it lies between the Pacific Ocean on the west and Atlantic Ocean on the east.

With the title of "The Melting Pot", it is no surprise that the United States is one of the most ethnically diverse nations. A great majority of the population are of European descent due to the original group of British settlers in the colonies with other national groups introduced by immigration.

In 1776, America gained independence from British power and were recognized as a new nation after the Treaty of Paris in 1783. The area of this new nation was divided into 13 colonies and during the 19th and 20th century, 37 new states were added as the nation expanded west across the continent. The United States of America has a history of war involvement, starting with their first victory against Britain to gain independence. America was also victorious in World War I, World War II, and the Cold War. The US remains the world's most powerful nation state.

The government of the United States of America is a constitution-based federal republic with a strong democratic tradition. There is a division of power between the state and federal governments with the federal government divided into three branches, the executive, legislative, and the judicial. The executive power is vested in the president.

The US has the largest and most technologically powerful economy with a per capita GDP of around \$48,000. Although the country was self-sufficient in the past, an increasing consumption, especially in energy, continues to make it dependent on other nations for imports. However, it leads all nations in the production of liquid natural gas, aluminum, copper, and gold. It is also the world's largest producer of both electrical and nuclear energy.

ABOUT AMERICAN EXPORTS

CONTACT PERSON:

Ahmed Imran - President

MAILING ADDRESS:

334 Cornelia Street #557
Plattsburgh, NY 12901
USA

We offer assistance and guidance throughout the import/export process. You are welcome to contact us at any step of the way.

FDC brand of vitamins and nutritional supplements represents over 30 years of providing exceptionally high quality supplements at a fair price to the consumer. From its inception, FDC has had strong science and a dedication to good health at its core. Fair pricing, reliable service levels, a comprehensive product mix, and solid consumer education efforts round out the foundation for our success. Those core values have driven the FDC brand to the forefront of every market it has entered for the last 3 decades. Today, FDC brand supplements continue to be manufactured under strict cGMP manufacturing regulations with an unrelenting drive for perfection

AgraCo Technologies

CONTACT INFO:

David Webster
CEO

220 South Second St
Dillsburg, PA 17019
USA

Tel: +1-800-337-4169
Fax: +1-717-502-0353

www.agraconew.com
dwebster@agraco.com

AgraCo Technologies International LLC traces its roots to Agway, Inc., a multi-billion dollar agricultural cooperative founded in 1964, and headquartered in Syracuse, New York. Stretching from Maine to Maryland, Agway, through many small companies, existed to support the numerous small farms of the Northeastern United States with agricultural products, new agricultural technologies, and a multi-state produce distribution system. Faced with a decline in membership from the aggregation or elimination of many small farms, Agway liquidated the assets of a number of its holdings, including those of CPG Technologies (CPG). In late 2000, David Webster, the former President and CEO of CPG, was offered the opportunity to purchase CPG's ethylene removal line of business, which included Extend-a-Life™ filters and Produce & Floral Saver™ sachets.

Diemold International, Inc.

CONTACT INFO:

Marketing Manager

2578 Paces Ferry Rd
North Orange Park, FL

diemold@att.net

The Gator-XL is the worldwide choice for proportionally adding any solution into a water system for agriculture, horticulture, sanitation, water treatment, etc.

Competitively Priced!

Designed for simple, low cost maintenance. Able to handle a wide variety of chemicals. Made of heavy duty, modular construction, with a separate water motor and chemical pump section, so the motor stays chemical free, and parts are easy to access for service.

Easily installed into the piping system with flexible hoses or can be installed directly into the piping system with the optional union connectors.

AGRICULTURE & LIVE STOCK

Agricultural Exports, Inc.

mike.mueller@
adventusgroup.com

The Adventus Group continues to protect the unique value of our proprietary and patented remediation technologies. These span the soil, sediment, and groundwater environments. By using in-house resources and partnering with best-in-class complementary enterprises, we continue to build out an exciting portfolio of field-proven technologies for the future. Our team of professionals intentionally did not replicate the business model of others, who mainly seek to charge exorbitant prices on the back of weakening science, and poor customer support. Instead, we intend to compete with a different kind of business model-one that insists on providing engineers, consultants, site owners and regulators with cost effective and permanent remedies.

Information is provided under the links listed below comparing Adventus Group products to the claims/performance of other competing products.

mikesharp@jonesexhaust.com

Jones Exhaust Systems, Inc., founded in 1968, was acquired by 1991 by N. David Landreth.

In 2001, Jones Exhaust Systems, Inc. acquired Road Industries, Inc. – a leading manufacturer of truck accessories. Road Industries, Inc. is recognized as the premier supplier of bed rails to the accessory market. In addition to bed rails, the company also produces utility racks.

Full Boar Performance was acquired in 2003 to enhance Jones Exhaust Systems' position as a leader in both aftermarket exhaust and the performance exhaust industry.

Zimmer

CONTACT INFO:

Art Zimmer

51 Eaton Street
Hamilton, NY 13346
USA

When looking at a 1920s or '30s classic Duesenberg, most people just love the design and style. Their mind is filled with visions of grace, grandeur and the Great Gatsby. They say, "What fun it would be to own and drive a motor car like that." Unfortunately, the realities of owning and driving a classic or antique motor car eliminate most people from ever bothering to purchase one.

The cost factor is not really the major deterrent. Although very rare classic motor cars can cost several millions of dollars, you can find nice classics in the \$70,000 to \$150,000 price range. But for most people, classic cars are still totally impractical. The lack of readily available parts and service is a major drawback. The lack of modern safety equipment is another problem. And let's face it, the old classics are not very comfortable to drive or ride in. Thus was born the neo-classic motor car (neo=new), the best of the old and the new together in one grand motor car: a match made in heaven. A classic car you can enjoy driving not just looking at.

jthompson@
westechbp.com

Westech began in 1979 as Engineered Profiles Ltd. and at that time extruded custom shapes for the window and door industry. In 1983 the first fully welded casement system was designed and offered to window fabricators in 1984. As the market conditions dictated new systems were added to meet the growing demands for a maintenance free, energy efficient, vinyl window. In 1997 vinyl fencing was added under the name Westech Building Products, a producer of vinyl fence, deck and rail components.

Westech has developed unique product lines that have become the benchmark of the fence industry. Both companies now operate under the Westech banner as member of the Westlake Chemical Corporation group of companies.

Bovano of Cheshire

CONTACT INFO:

Jim Flood
President830 South Main St
Cheshire, CT 06410
USA**Tel:** +1-888-816-9766
Toll Free: 1-888-816-9766**www.bovano.com**
jim@bovano.com

The History of Bovano of Cheshire began in 1952, when working alone in the basement of his home in Cheshire, Connecticut, artist Jim Bower began experimenting with powdered glass fused to small copper plates. His playful approach resulted in early designs applied to small glass enamel plates, which were sold under the name Bower Enamels.

It wasn't long before Jim met John Bonsignor who realized the potential of developing a much wider array of glass-enamelled products. John moved the studio to the upper floor of an old foundry building in Cheshire and began a passionate pursuit of copper enameling. The name "Bovano" was coined from the first two letters of the last name of each of the three original owners: Bonsignor, Van Leight and Noden.

CLASSIC Consumer Products is a unique business organization established in 1976, which delivers from a single source a creative marketing strategy for international markets.

We provide this resource on a continuous basis to our client's international marketing organization, and contribute in-depth knowledge and sales expertise necessary for developing long-term market share. Unlike exporters, sales agents and consultants, we participate actively as an integral part of our client's international sales management. We guide the key decisions and daily operational activities required for successfully implementing an agreed-upon sales program for international markets.

The Adventus Group continues to protect the unique value of our proprietary and patented remediation technologies. These span the soil, sediment, and groundwater environments. By using in-house resources and partnering with best-in-class complementary enterprises, we continue to build out an exciting portfolio of field-proven technologies for the future. Our team of professionals intentionally did not replicate the business model of others, who mainly seek to charge exorbitant prices on the back of weakening science, and poor customer support. Instead, we intend to compete with a different kind of business model—one that insists on providing engineers, consultants, site owners and regulators with cost effective and permanent remedies.

Information is provided under the links listed below comparing Adventus Group products to the claims/performance of other competing products.

4C Foods Corp. is a family-owned business that can be best described as steeped in tradition, yet well-positioned for the future. Like many family businesses, 4C Foods has a rich and colorful history. Unlike many family businesses, the company's original hallmarks - product and packaging innovation, commitment to quality and service, and a sense of teamwork among all those in the "4C family" - are still highly evident in 4C Foods' third generation of family leadership.

4C Foods has experienced tremendous growth since its modest beginning in 1935, without straying far from its roots. In fact, 4C Foods continues to operate in a state-of-the-art plant located not far from the original storefront where it was founded over six decades ago.

Clabber Girl Corporation grew from the original business that was incorporated over 150 years ago. Hulman & Company began in Terre Haute, Indiana in early 1850. Originally a wholesale grocery store, the business expanded into manufacturing with the addition of a storeroom and spice mill behind the store in 1869. The company continued to expand and by 1879 was manufacturing a variety of products, including spices, coffees, and baking powder under many different brand names. By 1899 Clabber brand baking powder was introduced, and today the Clabber Girl brand, as renamed in 1923, is distributed nationwide and to many different countries around the world.

Fax: +1-812-985-2925

www.westechbp.com
jthompson@westechbp.com

Westech began in 1979 as Engineered Profiles Ltd. and at that time extruded custom shapes for the window and door industry. In 1983 the first fully welded casement system was designed and offered to window fabricators in 1984. As the market conditions dictated new systems were added to meet the growing demands for a maintenance free, energy efficient, vinyl window. In 1997 vinyl fencing was added under the name Westech Building Products, a producer of vinyl fence, deck and rail components.

Westech has developed unique product lines that have become the benchmark of the fence industry. Both companies now operate under the Westech banner as member of the Westlake Chemical Corporation group of companies.

Jeffjohnson@rodix.com

Rodix is please to announce their new line of PLC Access Modems, designed to enable remote control of PLC Applications. A analog telephone line is all that is required to get you connected to your remote application. Our PLC Access Modem is compatible with many different PLC Manufactures.

Founded in 1971 in Rockford, Illinois, Rodix designed and implemented one of the world's first solid state control systems—the MC-600 Machine Control. As technology has improved over the years, the Rodix product line also evolved to stay on the leading edge of advancement. The MC-600 gave way to several new series of controls that were able to replace bulky autotransformers and integrate with the increasingly popular PLCs (Programmable Logic Controls).

INDUSTRIAL EQUIPMENT, SERVICES & SUPPLIES

Air Knife Systems

CONTACT INFO:

Ivan Banks

11510 Goaldcost Drive.
Cincinnati, OH 45249-1621
USA

Tel: +1-513-671-3322
Fax: +1-513-671-3363

www.exair.com
ivanbanks@exair.com

Air Knife Systems utilize compressed air for industrial applications that include drying, removing excess oils and liquids, dust blow off, and cooling.

An air knife is effective and efficient. The laminar (uniform) sheet of air is projected along the entire length of the air knife to provide an air flow that covers the entire surface of the product. Air Knife Systems from EXAIR have small profiles, are manufactured in various lengths and can be mounted to accommodate many industrial applications involving conveyors and webs, even in tight spaces. Whether your goal is to remove dust and contaminants, cool hot parts or blow off excess oil, water and liquids, the air knife is also energy efficient. By entraining high volumes of room air they use less compressed air and less energy than other blow off products.

Yarde Metals

yarde.com

Craig Yarde founded Yarde Metals Inc. in 1976 when he established a small office in the basement of his home in Bristol, CT and began brokering metal over the phone with \$1000 from the sale of his motorcycle! The phones seldom rang and were usually answered by his wife or his three year old daughter. Metal orders were picked up and delivered by family members in his station wagon. Craig partnered with his brother, Bruce Yarde, the following year and moved into a small rented factory on South Street in Bristol, CT. In 1986, Yarde Metals moved to an 85,000 square foot facility to accommodate the growing product line, services and sales. The company quickly outgrew this space and moved to a completely renovated state of the art 500,000 square foot facility in Southington, CT in June of 2003. Our corporate headquarters is more like a museum than a distribution warehouse and its unique style supports Craig's out-of-the-box business philosophy that has facilitated his success.

Bissell

Charles Gordon

PO Box 3606
Grand Rapids, MI 49501
USA

Tel: +1-616-453-4451
Toll Free: 1-800-237-7691

www.bissell.com
trisha@rasch@bissell.com

BISSELL's goal is to help you improve the ways you take care of your home, right down to the microscopic irritants.

Since 1876, we've spent years developing cleaning tools designed to keep your living environment up to the highest standards. In the mid-1800s, Anna and Melville Bissell owned a small crockery shop in Grand Rapids, Michigan. While cleaning up after the day's work, Anna often became frustrated with the sawdust that was embedded in the carpet. The tiny, stubborn particles clung to the carpet, and trying to sweep them up was becoming a time-consuming nuisance.

Anna and Melville Bissell Anna presented the problem to Melville, her mechanically inclined husband. Melville designed and constructed a carpet sweeper machine that he hoped would solve the problem once and for all.

ALCO is the international sales force of Spectrum Corp. We compound, blend, package and market a wide variety of specialty lubricants which includes two and four-cycle engine oils for handheld power equipment, bar and chain oil, small engine oils, gear oils, hydraulic oils for industrial and ag tractor applications, as well as many others. Currently ALCO produces private-label products for a broad array of OEM customers. In addition, we produce a full line of branded specialty lubricants and related products and ALCO offers a variety of packaging options ranging from 100mL up to 200L drums. We have over 30 years experience exporting our products through authorized distributors in Europe, Asia, Africa, Australia, North America and South America.

MotorAnalyzer USA

CONTACT INFO:

202 Travis St. Ste 204
Houston, TX 77002
USA

Tel: +1-713-237-8120
Fax: +1-713-237-8753

www.motoranalyzerusa.com
glenn@motoranalyzerusa.com

MotorAnalyzer represents a breakthrough in oil analysis to help determine the condition of an engine. The same way a doctor needs only a drop of blood to check your health, Motor Analyzer needs only a single drop of motor oil to display a wide variety of oil and possible engine conditions, without special tools or training.

MotorAnalyzer works with a single drop of oil. Simply place a drop of warm oil on the test sheet and watch it work! As the MotorAnalyzer test sheet absorbs the oil a series of circles form a clear visual pattern. Compare this graphic display with the Test Results Guide to determine the amount of soot in the oil; the status of the oil (whether of not an oil change is required); water in the oil and fuel in the oil.

PO Box 4040
Rapid City, SD 57709
USA

Tel: +1-888-379-4552
Fax: +1-605-343-0109

www.drwillardswater.com
drwater@gwtc.net

We thank you for taking the time to learn more about our amazing Dr. Willard's® products. Forty years ago, Dr. John Willard, Professor Emeritus of Chemistry, developed a complex formula that alters the molecular structure of normal water. Water which has been altered by Dr. Willard's patented micelle catalyst becomes more efficient and more reactive. Testing has shown that when ingested by plants and animals, Dr. Willard's Water® creates a more biologically active form of water in the bloodstream, so it does a better job of performing basic functions such as delivering food and nutrients to cells and expelling toxins.

In the forty years since Dr. Willard made his amazing discovery, Dr. Willard's Water® has been used by thousands of customers all over the world for a variety of applications such as improving personal health, increasing agriculture production and maintaining pet health.

lstocker@bslwater.com

BSL Global Water Solutions Inc. has engineered and built a transportable, packaged water treatment system using the proven capabilities of DAF (dissolved air flotation). The BSL system is ideal for water management in nearly every industry. It's modular design allows you to add units as you need them, thereby avoiding the necessity of purchasing large, costly systems.

BSL also offers Reverse Osmosis (RO) desalination systems for water treatment. BSL Water Systems range from 1,500 Gallons per day to 1,000,000 Gallons per day.

Our systems are designed to be easily shipped and installed, and offer a totally turnkey operation.

We offer expert technical support both before, during and after installation.

Hurley Chicago Company Inc.

CONTACT INFO:

Gus Losos

601 North Hill Street
Mokenca, IL 60954
USA

Tel: +1-815- 472-0087
Fax: +1-815-472-6026

www.hurleychicago.com
hurleychicago@sbcglobal.net

In 1969 Mr. Hurley became acquainted with drinking water problems through his association with the Du Pont family, (chemical company owners). Jason Hurley established the fact that clean water was essential to a healthy body. During the next 3 years Mr. Hurley compiled research and assembled the original Hurley Chicago Company. In 1972 he introduced the company to the public via direct sales. In 1979, Mr. Hurley sold his prosperous business to the current owner and president, Gus Losos.

Hurley Chicago Company was incorporated in 1979 and the executive office was moved from Chicago to Worth, Illinois. Mr. Hurley remained a consultant to the Company until his death in 1980. Product expansion started in April 1982 with the introduction of new Hurley products: an icemaker filter, and in-line sediment filters. A third model change was added to the existing Hurley Town & Country Water Systems in February of 1983 - the debut of the "Silver" finish.
